## What is EVshield

Transform your home charging cable into a fully-fledged charging station.

**EVshield** is a sturdy housing to protect the home charger.

all the conveniences of a charging station, but without the high costs! This is how **EVshield** has been designed.

Easy removal of the charger for holiday travels.

## Why EVshield

**EVshield** was created when both father and son started driving an EV, but no suitable charging Solution was available.

Both wanted to charge their EV at night via 230V, but were bothered by the inconvenience of the included home charging cable.

### Safety

Store the charging cable safely on the wall. Prevent trip hazards and damage to the charging cable. Use the optional combination lock to prevent theft.

### Ease of use

No longer messing around with the dirty charging cable. The cable is always ready for use. Plug in and charge!

### Customizable

Choose a cover plate of your choice, which one suits your home best? Fully customizable with various colors or even a full-colour photo print!

### European Product

**EVshield** designed and produced in the Netherlands. We only work with European professionals to provide the best and most sustainable charging solutions.
